Keeping Businesses Secure, Connected & Profitable
PLTPRO offers world-class data center services as well as: security features such as Private Suites with monitoring options, 24/7 services like Remote Hand and Managed Services, Disaster Recovery options with multiple layers of redundancy, carrier neutral subscription services, high-density equipment support (up to 15kVA per rack or 150W per square feet space), Colocation and Racks, and more.

Founded in world-renowned data center One Wilshire, Los Angeles, PLTPRO has always offered first class products and services. In 2011, PLTPRO expanded to include its location in Cyberjaya, Malaysia; known as CSF.

PLTPRO@CSF is dedicated to keeping your business secure, connected, and profitable.

PLTPRO is trusted by big names, and corporations, worldwide because of our dedication to treating each client as our #1 priority. We proudly serve a variety of well-known financial service institutions, oil & gas conglomerates, companies, and clients worldwide.

Our SERVICES & PRODUCTS

PLTPRO offers world-class data center services as well as: security features such as Private Suites with monitoring options, 24/7 services like Remote Hand and Managed Services, Disaster Recovery options with multiple layers of redundancy, carrier neutral subscription services, high-density equipment support (up to 15kVA per rack or 150W per square feet space), Colocation and Racks, and more.

We are proud to be known for these unique features:

- Our Malaysian Data Center is recognized as one of the premiere facilities worldwide, complete with Private Suites, Colocation & Racks, and Disaster Recovery.

- Our reputation and commitment to service. We are trusted by the biggest names in each industry. We keep those names in business while keeping their data private.

- Our dedication to and use of green technologies such as Cold Aisle Containment Systems and energy efficiency measures, including LED lighting.

We are trusted by industries such as:

- IT & Content Providers
- Financial Services
- Oil & Gas
- MNC
- Governments and businesses throughout Malaysia, China, the US, Singapore, Thailand, India, Hong Kong, Taiwan, and more.
Keeping Your Business Secure

Business runs on information; we keep both secure with a variety of available products and services. In our data centers, we offer services such as internet bandwidth options, Metro-E connectivity, Managed Services, and more. Furthermore, PLTPRO uses only the finest colocation and racks management, placed strategically in Private Suites, to keep your information private. Each Private Suite is more secure than the standard chain link fence; our suites are solid metal cages, only accessible through our extensive security protocols. We use a combination of key cards, biometrics, physical guards, CCTV, monitoring systems, and built-in security redundancies to ensure that your information, and business, is secure.

Our secure facilities and services can be utilized as a primary location or as disaster recovery site. Either way, your business, and information, is safe with PLTPRO.

Keeping Your Business Connected

Businesses need to be available and connected constantly. We won’t let downtime affect your bottom line; our facilities are designed with multiple redundancies to eliminate downtime, or minimize it in event of disasters.

Our building is a purpose built data center, drawing power and network connectivity from multiple sources. Thus, if one facility experiences outages, our contingencies ensure that your business is still connected and available. In the event of total power failure, the building 12 units of 2MVA generators will ensure business as usual while local sources are quickly repaired.

Keeping Your Business Profitable

We provide these services with your profit margins in mind. By keeping your data, and business, secure and connected, you’ll be open for business on your terms.

PLTPRO offers additional services to facilitate your business and keep costs down:

- Remote Hand: We’ll act as your eyes and hands so that you don’t have to travel to our Data Center for basic technical tasks.

- Managed Services: Let us handle higher level services, such as managing network equipment, firewalls, performing backups, or other tasks so that you don’t have to.

- PLTPRO@CSF is always looking for additional ways to serve our clients.
DISASTER RECOVERY
Our facilities are strategically located between 20-30 km from both Kuala Lumpur and Petaling Jaya. This location allows us to set up multiple facility redundancies, ensuring your data is secure and available. Our facility can be utilized as either primary or secondary location, or Disaster Recovery (DR) site. In a disaster, we also have a command center available to keep your data available, or to restore it as quickly as possible.

PRIVATE SUITES
PLTPRO keeps your data secure and private. Other data centers use a traditional chain link fence; we take your security, and privacy, to the next level. We store your data inside of solid metal cages. No unauthorized personnel has access to, or can see, your information and equipment. Other security options include CCTV, key card access, and more.

COLOCATION & RACKS
Data servers and centers need to be kept in a sterile, controlled environments to ensure the system and data integrity. We use Cold Aisle Containment System, a green technology that improves airflow, uses energy efficient equipment, and controls environment conditions, such as temperature and humidity. This ensures equipment longevity, security, and productivity.

RECOVERY
Our facilities are strategically located between 20-30 km from both Kuala Lumpur and Petaling Jaya. This location allows us to set up multiple facility redundancies, ensuring your data is secure and available. Our facility can be utilized as either primary or secondary location, or Disaster Recovery (DR) site. In a disaster, we also have a command center available to keep your data available, or to restore it as quickly as possible.
PLTPRO@CSF values innovation and is constantly setting industry standards. Our data center is built to meet, or exceed, Tier-3 compliance. Our facilities are considered, quite frankly, the best in the country. PLTPRO is ISO 27001:2013 certified. Our infrastructure is designed to support high density equipment of up to 15kVA per rack or 150W per square foot of space.

PLTPRO is carrier neutral; subscribe via the any service provider.

Our friendly and responsive staffs are trained to provide 24/7 services like Remote Hand and Managed Services.

REDUNDANCIES

- Our facilities is powered by two power stations: Putrajaya and Kapar.
- On site generators, with up to 3 days supply of fuel, are on hand in case of multiple site power failure. Pre-arrangement is done to ensure fuel replenish within 4 hours.
- Our network uses multiple upstreams and service providers for constant connectivity.
- In a disaster, we have both data center and disaster recovery offices to facilitate network connectivity and equipment support.
- PLTPRO@CSF is always improving. We’ll keep your business safe with additional system redundancies and upgrades.
